

Maximum shed sizes

The PACA management committee wishes to remind all allotment members that there are rules concerning the **maximum** size of sheds that may be erected on this site.

Please notify the committee of the intention to build a shed **BEFORE** doing so, as the position of the shed on your plot is important.

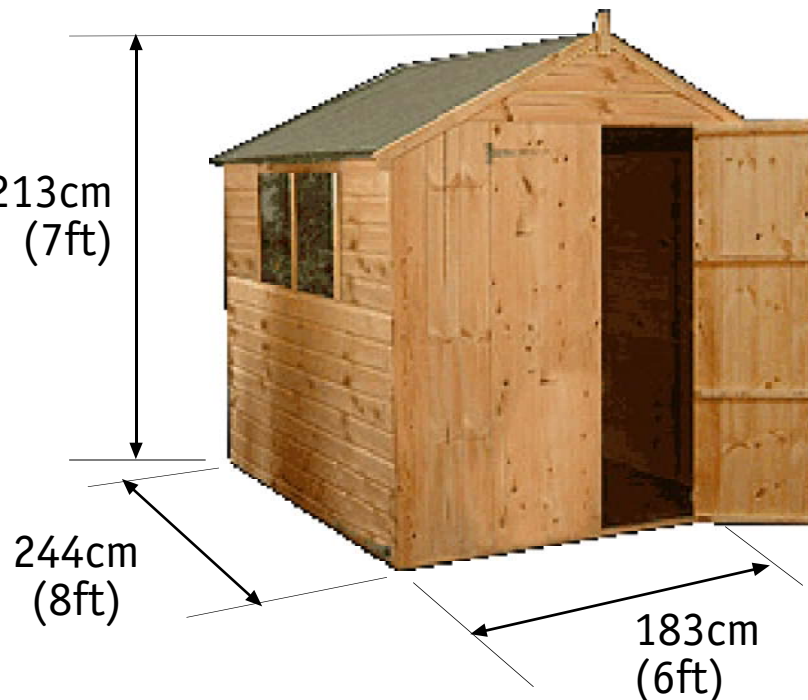

PITCH ROOF

213cm
(7ft)

APEX ROOF

213cm
(7ft)

We realize that many large sheds have been constructed in the past, but now that the membership has increased, there have been objections from plot holders concerning the number of the oversized sheds that have appeared. **We now have to insist that all sheds are commercial sheds of the size and style shown here.**
